The growth team's guide to better attribution.

Stop optimising for installs. Start understanding what actually drives revenue.

Linkrunner is a mobile measurement partner (MMP). It connects your marketing campaigns to the installs, in-app activity, revenue and retention that follow. linkrunner.io →

01

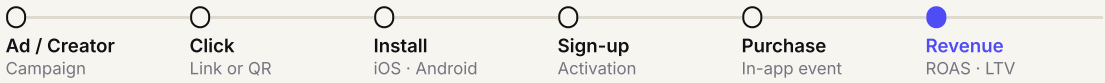

What is Linkrunner?

Attribution connects every stage, so you judge campaigns by revenue, not downloads.

Attribute
See which campaigns, links and creatives bring users in.

Measure
Connect installs to sign-ups, revenue, ROAS and retention.

Optimise
Decide what to scale, what to fix and where to spend next.

02

What can you do with it?

Campaign attribution
Know where installs and conversions come from.

Creative performance
Tie each creative to revenue and ROAS.

Deep links
Route users to the right screen, even post-install.

Revenue & ROAS
See what each campaign actually earns.

Cohorts & retention
See how acquired users behave over time.

iOS & SKAN
Privacy-aware measurement for iOS campaigns.

Integrations
Ad and measurement signals in one view.

03

Useful tools. Free to explore.

ROAS Calculator	Model advertising returns and estimate when campaigns break even. ↗
CPI Benchmark Explorer	Compare cost-per-install by market, platform, app category and period. ↗
LTV Calculator	Estimate lifetime value for subscription, IAP, ad-monetised and hybrid apps. ↗
MMP Cost Calculator	Estimate attribution costs at your install volume and compare pricing. ↗
UTM Builder	Create consistent campaign-tracking links and QR codes. ↗

04 · Linkrunner + Claude

Your attribution workflow, inside Claude.

Linkrunner's MCP connector lets you work with Linkrunner in Claude using plain-language prompts. Once you connect and authorise your account, you can create a project, retrieve your SDK token, and query supported campaign, statistics, funnel and setup information.

`https://mcp.linkrunner.io/mcp` Explore the integration →

SDK setup still needs a developer; ad data needs the right integrations and permissions.

TRY ASKING

- "Which campaigns drove the most installs in the last 7 days?"
- "Which campaigns brought users who reached onboarding?"
- "Check whether my attribution links and tracking setup are configured correctly."

05

Start measuring. No annual lock-in.

01 Visit Linkrunner and create an account.

02 Set up your app project and integrate the SDK.

03 Configure attribution and key in-app events.

04 Connect ad integrations and analyse performance.

FREE
25,000 installs
First attributed installs, no credit card.

GROWTH
Pay as you go
Postpaid, as install volume grows.

ENTERPRISE
Custom
For teams with specialised needs.

VC-backed? The separate Startup Program offers 50,000 free installs; eligibility and terms apply. See program →

Know which campaigns actually move your business forward.
